

JEZREEL RAMOS

Computer Science Student | Intelligent Systems | Software Development | Data Analytics | Artificial Intelligence

Location: Philippines | Phone: +63 948 447 8536 | Email: jezeelramos@gmail.com

LinkedIn: <https://www.linkedin.com/in/somarjez> | GitHub: <https://github.com/somarjez> | Portfolio: <https://somarjez.github.io>

PROFESSIONAL SUMMARY

Computer Science student specializing in Intelligent Systems with hands-on experience in data analytics, statistical research, machine learning, full-stack software development, and administrative data management. Proficient in Python, SQL, Pandas, Scikit-learn, FastAPI, JavaScript/TypeScript, Next.js, React, Django, Laravel, PostgreSQL, MySQL, and Microsoft Excel. Experience cleaning and validating 100+ research datasets, building analytics and decision-support platforms, and supporting university records and document-control workflows.

TECHNICAL SKILLS

Programming Languages: Python, SQL, JavaScript, TypeScript, Java, Dart, C# (.NET), HTML5, CSS3

Frameworks & Libraries: FastAPI, React, Next.js, Recharts, Django, Django REST Framework, Flask, Laravel, Flutter, Tailwind CSS, REST APIs, Pytest

Data & Artificial Intelligence: Pandas, Scikit-learn, TensorFlow, Jupyter, ETL Pipelines, Statistical Analysis, Data Cleaning, Exploratory Data Analysis (EDA), Machine Learning, Computer Vision, Knowledge Representation and Reasoning (KRR), Generative AI, Prompt Engineering

Databases & Tools: PostgreSQL, NeonDB, MySQL, SQLite, Firebase/Firestore, Alembic, Git, GitHub, VS Code, Microsoft Excel, Power BI, Tableau, Figma

EDUCATION

Bachelor of Science in Computer Science, Major in Intelligent Systems

Laguna State Polytechnic University - Santa Cruz Campus | Laguna, Philippines | Expected 2027

Relevant Coursework: Software Engineering, Database Systems, Data Structures, Artificial Intelligence, Machine Learning

PROFESSIONAL EXPERIENCE

Student Assistant | Laguna State Polytechnic University (LSPU), Santa Cruz

Laguna, Philippines | Jul 2026 - Present

- Processed, encoded, sorted, and maintained CCSS forms and administrative records across 10+ documented duty days, supporting accurate data entry and organized records management.
- Maintained document-control data across form codes, revision numbers, and implementation dates while scanning, filing, digitizing, and organizing administrative records.
- Supported university offices through Microsoft Excel data encoding, document collection and distribution, records organization, and inter-office paperwork delivery.

Data Research Analyst and Statistician | Freelance

Remote | Jul 2026 - Present

- Cleaned, validated, and organized 100+ datasets across academic research projects by identifying missing values, duplicate records, formatting errors, and data inconsistencies.
- Performed descriptive statistics, Pearson correlation, and t-tests based on research objectives; interpreted results and prepared structured tables, summaries, and written findings for thesis and academic research clients.

Educational PowerPoint Content Creator | Freelance

Remote | Nov 2024 - Aug 2025

- Created 20+ PowerPoint-based lessons for elementary students using age-appropriate visuals, simplified explanations, and consistent instructional formatting to improve readability and classroom use.

Webpage Developer | Freelance

Remote | Jan 2024 - Feb 2024

- Built and refined a static webpage using front-end development, layout design, usability testing, and iterative revisions to improve visual organization and user experience.

Student Staff - Work Immersion | Bubukal Elementary School, DepEd Philippines

Laguna, Philippines | May 2023 - Jun 2023

- Processed 70+ printed and photocopied documents while supporting routine clerical, administrative, and records-management requests during a 2-month immersion.
- Coordinated information with teaching and administrative staff, documented meetings and conferences, and assisted the Headteacher and School Principal with planning and administrative tasks.

PROJECTS

OSCA-AgeSense - Undergraduate Thesis | Technologies: Python, Scikit-learn, Laravel, MySQL

- Prepared and analyzed 389 senior-citizen records across 16 barangays using data cleaning, feature preprocessing, statistical analysis, and exploratory data analysis; implemented and evaluated machine-learning models in Python and Scikit-learn.
- Achieved up to 98.3% cross-validated accuracy and 100% recall on high-risk seniors; communicated findings through research tables, visualizations, and system outputs.

WorkWise PH: Labor-Market Analytics Platform | Technologies: Python, FastAPI, PostgreSQL, Next.js, TypeScript

- Built an end-to-end labor-market analytics platform that transforms PSA Labor Force Survey Excel workbooks into interactive dashboards covering employment, industry, occupation, education, hours, and pay trends.
- Designed a config-driven ETL pipeline with four parser archetypes that normalizes heterogeneous datasets into a unified PostgreSQL fact table, allowing new datasets to be added through configuration instead of new pipeline code.
- Reduced full data-reload time from about 10 minutes to about 60 seconds (approximately 10x) by replacing pandas to_sql with PostgreSQL COPY bulk loading on NeonDB.
- Developed a layered FastAPI backend with repositories, services, routers, Alembic migrations, and precomputed analytics summaries; built a responsive Next.js/Recharts dashboard with a custom data explorer and printable PDF report export.
- Created a pytest suite with a fast read-only tier (about 30 seconds) and an opt-in ETL round-trip tier, plus data-quality validators and deployment documentation for environment, CORS, and operational setup.

404 DreamTeam - Hybrid ML + KRR Platform | Technologies: Python, Jupyter, Machine Learning

- Built a hybrid artificial intelligence platform combining machine learning and Knowledge Representation and Reasoning (KRR) using a 10,000+ record housing dataset to support affordable and sustainable housing decisions in the Philippines.

Findify Web and Mobile | Technologies: Flask, Python, Flutter, Dart, Firebase

- Created e-commerce web and mobile applications with 100+ synthetic product listings, vendor dashboards, order tracking, product discovery, cart features, and Firebase authentication/data; user-tested with 20 participants.

SBCC Management System | Technologies: Django REST Framework, React, PostgreSQL

- Built a full-stack church management application supporting 120+ members with event, attendance, and volunteer-management workflows.

Educational RMS | Technologies: Django, React, JavaScript

- Implemented room scheduling, equipment management, and capacity-simulation workflows using synthetic data to model academic resource usage scenarios.

Quizera | Technologies: Flask, Python, Firebase

- Built an e-learning platform aligned with Computer Science coursework, supporting lessons, quizzes, examinations, progress tracking, and completion certificates.

AWARDS AND COMPETITIONS

Hack4AProgress 2026 - Top 3 Finalist | DOST CALABARZON | Team EverForge, LSPU - Santa Cruz Campus | Sep 2026

- Co-developed AgriWise, an AI- and GIS-based agricultural decision-support platform using Philippine Statistics Authority datasets to forecast supply, demand, prices, and market opportunities across CALABARZON.
- Presented ML forecasting models achieving 82% accuracy alongside GIS analytics, a market recommendation engine, and a retrieval-augmented generation (RAG) agricultural chatbot; advanced to the final pitching round among 30 teams.
