PROFESSIONAL SUMMARY

Detail-oriented Computer Science student specializing in Information Systems with experience in data analysis, quality assurance, AI and machine learning, educational content development, and software testing. Skilled in reviewing structured information, identifying errors and inconsistencies, analyzing data using Python, SQL, Pandas, and Excel, and presenting findings clearly and accurately. Familiar with generative AI, prompt engineering, machine-learning systems, data privacy practices, and rubric-based academic evaluation. Able to follow detailed instructions, work independently, meet deadlines, and provide clear written feedback.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, TypeScript, Dart, Java, C# (.NET), HTML5/CSS3, SQL

Frameworks/Libraries: React/Next.js, Flask, Django/DRF, Laravel, Flutter, Tailwind CSS, REST APIs, TensorFlow, Scikit-learn

Databases: MySQL, PostgreSQL, SQLite, Firebase/Firestore

Machine Learning/Data Science: Machine Learning, Computer Vision, Knowledge Representation and Reasoning (KRR), Prompt Engineering, Generative AI, Chatbots, Machine Translation, Data Cleaning, Exploratory Data Analysis (EDA), Linear Regression, Data Visualization, Data Storytelling, Pandas, Jupyter, Power BI, Tableau

Tools: Git/GitHub, VS Code, Figma, Excel, Microsoft Word, PowerPoint, Google Docs, Google Sheets, Google Slides, Google Drive, Claude Code, ChatGPT, Codex, GitHub Copilot

Other Technologies: Software Development Life Cycle (SDLC), Testing, Quality Assurance, Data Privacy and Compliance, Document Formatting, Report Preparation, Presentation Development, File Organization

EDUCATION

BS Computer Science, Major in Information Systems | Laguna State Polytechnic University

A.Y. 2026-2027

· Currently 4th-year level; coursework across software engineering, database systems, data structures, and machine learning.

PROJECTS

OSCA-AgeSense, Undergraduate Thesis | Machine Learning, Python, Laravel, MySQL

· Prepared and analyzed a structured dataset of 389 senior-citizen records across 16 barangays using data cleaning, feature preprocessing, statistical analysis, and exploratory data analysis. Developed and evaluated clustering, classification, and regression models using Python and Scikit-learn.

· Achieved up to 98.3% cross-validated accuracy and 100% recall on high-risk seniors; presented results through visualizations and research findings.

· Used Claude Code and ChatGPT to support development, debugging, data-analysis workflows, and apply machine-learning.

404 DreamTeam, ML + KRR | Python, Jupyter, Machine Learning

· Built a hybrid AI platform combining machine learning and Knowledge Representation and Reasoning, trained on a 10,000+ record housing dataset to guide affordable, sustainable housing choices across the Philippines.

Educational RMS | Django, React, JavaScript

· Developed a room scheduling, equipment management, and capacity-simulation system using synthetic data to model usage scenarios for academic settings.

SBCC Management System | Django REST Framework, React, PostgreSQL

· Built a full-stack church management app supporting 120+ members, handling events, attendance, and volunteer management for Santa Cruz Bible Christian Church.

Findify Web and Mobile | Flask, Python, Flutter, Dart, Firebase

· Created e-commerce web and mobile applications with 100+ synthetic product listings, featuring vendor dashboards, order tracking, product discovery, cart, and Firebase-backed authentication/data; user-tested with 20 participants.

Quizera | Flask, Python, Firebase

· Developed an e-learning platform aligned with the Computer Science curriculum, where students learn, practice, and earn completion certificates through lessons, quizzes, and exams.

EXPERIENCE

Freelance Research Data Analyst, Remote, Philippines

July 2026

· Encoded, cleaned, and validated 100+ datasets across 4 client research projects by checking for missing values, duplicate entries, format errors, and inconsistencies.

· Performed statistical analyses such as descriptive statistics, Pearson correlation, and t-tests based on each project's research objectives. Interpreted results using statistical metrics and prepared organized tables, summaries, and written findings.

Educational PowerPoint Content Creator, Laguna, Philippines

Nov 2024 - Aug 2025

· Created 20+ PowerPoint-based lessons for elementary students over a 9-month period, using clear formatting, visuals, and simplified explanations. Designed age-appropriate instructional slides to support classroom learning and improve lesson readability.

Webpage Developer, Laguna, Philippines

Jan 2024 - Feb 2024

· Built and designed 2 static websites over a 1-month period using front-end development principles.

· Applied layout design, visual organization, testing, and revision to improve the user experience.

Work Immersion, Bubukal Elementary School, Laguna, Philippines

May 2023 - June 2023

· Built and maintained courteous and effective working relationships.

· Photocopied and printed 70+ documents on behalf of clerical support teams.

· Coordinated communication across nearly the entire school staff to address student progress and concerns effectively.

· Sat in on meetings, hearings, and conferences to document activities.

· Supported the Headteacher in strategic processes to achieve objectives.

HACKATHONS & COMPETITIONS

Hack4AProgress 2026 – Top 3 Finalist | DOST CALABARZON

Sep 2026

Team EverForge, LSPU – Santa Cruz Campus

· Co-developed AgriWise, an AI- and GIS-based agricultural decision-support platform using PSA (Philippine Statistics Authority) datasets to forecast supply, demand, prices, and market opportunities across CALABARZON's five provinces.

· Built and presented ML forecasting models achieving 82% accuracy, alongside GIS analytics, a market recommendation engine, and a RAG-based agricultural chatbot.

· Advanced to the Final Pitching Round as a Top 3 Finalist among 30 competing teams from CALABARZON.
